MAY SPLIT THE CHURCH.

Extreme Views of Rev. Sprecher on the Presbyterian Seminary Question.

CLEVELAND, O., Nov. 23 .- The action of Allegheny Seminary in acceding to the request of the Presbyterian General Assembly that all seminaries of the church shall so change their charters that these institutions will be entirely under the authority of the assembly caused a stir among the Cleveland Presbyterians, many of whom belong to the liberal party. Rev. Dr. S. P. Sprecher, of the Euclid-avenue Presbyterian Church, one of the most extreme and brilliant liberals in the church, said: The liberals hoped for better than this. but are not greatly disappointed, for Allegheny is one of the most conservative of the seminaries. I don't believe the majority of the seminaries will accede to the assembly's demand. This question is more likely to split the church than was the Briggs case. The act of the General Assembly was one of as extreme tyranny as can well be imagined."

Yarborough had been convicted in Lincoln county for the murder of Josie Davis and sentenced to prison for life. He was in charge of an officer en route to the State's prison when intercepted by the mob.

The Heine Statue Controversy. NEW YORK, Nov. 23 .- The central committee of the Heine Memorial Fountain Association held a meeting to-day behind closed doors, at which the decision of the National Scupiture Society on the Herbe design of the monument which it is proposed to erect in Central Park was discussed. Mr. Katzenmyer, president of the Heine fair committee, said to-night: "It would not be exactly right for me to tell you what was done at the committee meeting this afternoon, but action was taken the adverse decision of the National Sculpture Society, and on Monday we shall go before the park board and try and secure permission to erect the statue in Central Park. We claim that the work is one of art, and a masterplece at that. We ask for some site within the park, and expect that it will be granted.

CAYUGA SALOON KEEPER WAYLAID BY MIDNIGHT ASSASSINS.

Death of a Hendricks County Pioneer Who Was in the Legislature with R. W. Thompson.

Special to the Indianapolis Journal,

NEWPORT, Ind., Nov. 23 .- A bold murder and robbery was committed at Cayuga, six Stark, a saloon keeper at that place, was waylaid about 19:30 o'clock, terribly beaten and robbed. He had about \$135 on his person when he left the saloon. He resides two blocks from his place of business and had saulted. Mr. Stark, although sixty-two years old, struggled desperately with the desperadoes. It is believed he was getting the best of them, when they broke down a small sugar "stub" that was near and struck him a blow across the back of the head, which rendered him unconscious. He was then relieved of all the money he had

Mr. Stark was a fine old gentleman and was respected by everyone. The funeral services will be held at his residence Monday afternoon.

INDIANA OBITUARY.

Col. Thomas Nichols, Whose First Vote Was for Henry Clay

Special to the Indianapolis Journal. DANVILLE, Ind., Nov. 23.—Col. Thomas Nichols, a pioneer of this county, died last night of old age, in his ninety-third year. His life has been eventful, and is closely connected with the history of this county.

He was born in Kentucky, in 1803, and at the age of seventeen came with his father to Indiana, first locating on White river, and then, in 1822, moving to Guildford township, this county, being one of the four families in that section. In 1825 Thomas Nichols entered eighty acres in Center township, two miles north of Danville. In 1839 he married Martha, daughter of James T. Hadley, and they had nine children, four of whom are living-William H., county auditor. E. D. and O. E., druggists in this city, and Mrs. Harney, living in Lebanon. In 1828 Colonel Nichols was elected sheriff of the county, and moved to Danville, where he has since resided. He was the second sheriff or the county. When his term of office expired he worked at the carpenter's trade, many of the older houses in Danville being monuments to his skill. From 1833 to 1836 he represented the county in the Legislature, serving with the Hon. R. W. Thompson, of Terre Haute, with whom he continued a warm friend. Mr. Thompson is now the only survivor of those sessions. In 1844 he was again elect-

ed sheriff, and served four years. In 1860 he was again elected and served four years, making twelve years in that office. In 1832 he organized a company to serve in the Black Hawk war, and was elected its commander. This company went to Fort Dear-born, and, Black Hawk being then captured, he returned home. In 1878 he was elected justlec of the peace, and held the Sylvanus Dryden Phelps was born in Suf- office until the infirmities of age compelled him to relinquish it, serving longer than any man in the county in that position. Since 1847 he has been a member of the M. E. Church, and was the first Mason made in this county, in 1846. In this order he held all the offices, and was master of the lodge twelve years. Politically he was an old-line Whig, and cast his first vote for Henry Clay, in 1824. He assisted in organizing the Republican party in this county. Two of his sons served in the Union army. Colonel Nichols was one of the best known men in this county, always holding the esteem of the people. He obtained his title of colonel, by which he was commonly known, by virtue of his office in the State

militia, to which he was elected in 1825, and held until the State abolished the organization. He has always stood for good government, and was a potent factor in forming the high moral standing of the county. The funeral will be on Sunday afternoon,

at the M. E. Church, the services to be conducted by Revs. Walker and Hull. James McNutt.

He will probably render his decision Monday. Charles McCabe, of Covington, attorney for the Kellers, has filed his affidavit for a change of venue to get a fair trial. Many surmise it will go to Newport, Terre Haute, Brazil or Greeneastle. This case of murder is a very mysterious one and it will be a big trial. The dead body of Clara Shanks was found in Wolf Creek Falls last July, and the Kellers charged with the crime are Daniel Keller and Nannie Keller, his wife, and Maggie Keller, sister to Daniel Keller.

Lackey's March Sale.

Special to the Indianapolis Journal. RICHMOND, Ind., Nov. 23 .- John Lackey, of Cambridge City, is sending out entry blanks and other printed matter for his combination sale, March 10, 11, 12, 13 and 14, 1896. The entries close on Jan. 12. Mr. Lackey will only catalogue four hundred horses, and thinks there will be no trouble in securing that number, as several hundred are in sight. The animals sold at his sale last year brought uniformly good prices-better, in fact, than at other sales. Another feature of that sale was the number of speed horses sold that were money winners. Nellie McCrory won for Barney Demarest \$8,000 the first race she started in and was never behind the money all season. Similar reports in proportion

Firemen on Strike.

Special to the Indianapolis Journal. MUNCIE, Ind., Nov. 23 .- This morning the firemen at station No. 1 resigned. as a result of the action and talk of some members of the City Council with reference to the charges of larceny against members of No. 2. For a time to-day the Muncle fire department had but three men on duty. This afternoon members of the Council met and induced the men at No. 1 to return. The trouble was caused by Councilman Lemon, who is not a member of the special committee appointed to investigate, but is chairman of the committee on fire department and has the power to discharge all the men. His action and talk cut short the investigation and has not been approved by Mayor Cromer or

Hermit Willing Dead. POMONA, Cal., Nov. 23.-News has been received of the death in San Gabriel canyon of Enoch Willing, an aged hermit, who was a first cousin of Edward Willing, the father of the present Mrs. John Jacob Astor, of New York. Willing often spoke of his wealthy relations and of the fact that his wealthy relations and of the fact that he ran away when sixteen years old from the home of a rich family in Baltimore to become a sailor. He sailed over the world until he was nearly fifty years old and then he made his home in the hut built by himself in the upper part of San Clebrick convent.

UNUSUAL COURSE

CARLISLE ENDEAVORING TO OFFSET THE RAID ON HIS GOLD.

ubtreasurers Notified to Pay Express Charges Both Ways on Coin Sent in Exchange for Currency.

WASHINGTON, Nov. 23.-The Treasury Department to-day, in order to recoup in part its falling gold reserve, took the extremely unusual course of agreeing to pay express charges both ways on gold forwarded in exchange for currency. Secretary Carlisle, in a circular letter sent to United States subtreasurers during the afternoon, instructed them hereafter to receive gold coins in sums of \$500 and multiples thereof and to pay express charges on the gold and also on the currency returned in exchange therefor. He also instructed the subtreasurers to receive light weight gold coin and to ascertain the exact value of such coin and nay for it at face value less 4 cents for each troy grain such coins are found to be below standard weight. This is believed to be the second time in the history of the government that it has paid express charges both on the gold received and the currency returned therefor. | CAN The only exception, it is said, was in 1893, when it was done in a few instances. The Secretary's letter of instruction to subtreasurers regarding light-weight coin was as follows: "Department instructions of July 9 and Aug. 23, 1895, requiring you to reject and place a distinguishing mark on all gold coins presented to your office for deposit which are found to be below the least current weight, are hereby so modified as to instruct you, when requested, to accept all such coins at valuation in proportion to their actual weight, such valuation to be determined by deducting from ominal value 4 cents for each grain, troy, found below the standard weight of each piece, all light-weight pieces thus received by you to be held in the cash of your office, separate from full-weight coins, and each bag of such coins to be plainly marked with the amount of face and actual values of contents. If the depositor should prebelow the least current weight returned to him, you will, before returning them, stamp each piece with the distinguishing mark referred to in department letter."

Campania Carries Away \$4,670,000. NEW YORK, Nov. 23.-The steamship Campania, which sailed for Liverpool today, carried one of the largest shipments of gold ever sent from this port. The shipment consisted of \$4,000,000 in gold bars and \$670,000 in gold coin. The gold was not received until a few moments before the departure of the vessel. It was carted from the subtreasury to the Cunard pier in express wagons, guarded by four men. Each man held a rifle by his side. It took three wagons to transfer the treasure to the pier. On the arrival of the wagons at the pier. they were driven close to the side of the steamer. An extra gangway had been put up for the use of the men who were to carry the gold aboard the yessel. They were all old employes of the company. On the dock a rope had been stretched from the port to the starboard side of the vessel to prevent the passengers and visitors from going within ten feet of the gold. The strong box of the Campania is a steel vault, built on the main deck of the vessel. Its walls are three feet thick and it is guarded by a door on which there are three locks. The captain carries the key of one lock, the purser of another and the chief boatswain of the third. To open the door the three keys must be inserted in the locks at the same time. The gold bars which were shipped to-day were wrapped in sacking to prevent wear. The coin was packed in casks about one foot high: Full casks contained \$8,000 each. The gold is insured.

FOREIGN-GROWN MAIZE.

It Is Inferior to American, Being Deficient in Protein and Fats. WASHINGTON, Nov. 23 .- An analysis of maize from the Black sea and the Danube was recently made in the chemical division of the Department of Agriculture with a view to determine its comparative value as

a feeding stuff with that grown in this country. Of late years these countries have been shipping corn in large quantities to Germany and Great Britain and other countries of Europe, the imports into Germany from Roumania alone having last year exceeded those of the United States. The advantages enjoyed by these countries of southern Europe in competition for this trade, owing to their geographical location and the avoidance of a long sea voyage is believed in this country to be offset by the superior quality of the American product, and this impression is strikingly confirmed by the recent analysis. The samples were found to correspond in composition to poor corn grown in the United States, being samples from the Black sea and the Dan- of No. 34 Avenue de Villers, the library of ube, the American average is 10.5. The which faces the handsome gothic building samples of dent and flint exceeded this, in the Place des Malesherbes, where Gounod eastern Europe is 4.13, while the average for American corn is 5.4, and many samoles of the latter showed 51/2 and 6 per cent. The American average, as given, moreover, includes numerous samples of inferior corn

and cannot be said to fairly represent the average of corn exported. It is pointed out by the department that while these facts speak eloquently of the higher quality of the American product they also testify with equal force to the importance of maintaining the high standard of the feeding quality of American corn in foreign markets, as that is unquestionably the characteristic on which main reliance must be placed to enable the American growers to compete successfully with the cheap labor of southern Europe. The shipment of inferior grades of corn, under the circumstances, would be to deal a death blow to American corn exports even to those countries where maize is used only as

food for stock. Battle Ship Rams Located. WASHINGTON, Nov. 23 .- The board appointed by the Secretary of the Navy, with Admiral Walker at its head, has made a report on the location of the rams on the new battle ships Nos. 5 and 6, recommending that they be placed eleven feet below the water line, as on the Texas, in accordance with the English system. The Bureau of Naval Construction, in its plans fer these vessels, placed the rams five feet below the line, which is a compromise between the English system and the French, the the English system and the French, the latter putting them on the water line. CHALLENGES THE MANAGER OF THE SENTINEL.

Prompt Acceptance by That Paper -A Public Test to Be Made.

And the Result To Be Published in This Paper.

HOBBS SUBSTANTIATE HIS CLAIM?

In view of the great importance of this challenge, not only to the citizens of Indianapolis, but to the entire civilized world, the Sentinel feels justified in accepting it. The public will be interested in the outcome of what may be properly termed a public investigation of a discovery that would seem destined to become famous and prove of incalculable importance to the great mass of people who are suffering in one way and another from kidney ail-

The offer made by Hobbs, in his challenge above alluded to, is a simple and plainly-worded one. In a nutshell, he asfer to have the pieces that are found to be | serts that he has discovered a remedy that will positively cure that most stubborn and common of all complaints, disease of the kidneys, which is wrecking men and women by the score daily.

The good that can be accomplished by a universal specific, one that can be administered in a simple and plain way-in other words, a grand universal medicine for all kidney troubles-will be hailed as a godsend

The claims made for the remedy in question are, speaking in a general sense, that the Hobbs Medicine Company, of Chicago and San Francisco, are the owners of an asparagus kidney remedy which they positively assert will cure all kidney diseases, with the exception of those where tumors and ulcers have formed, and a surgical operation is necessary.

It is not the purpose in this article to enter into a general discussion of the vast ter into a general discussion of the vast number of different forms of kidney troubles, but to treat them as a whole, as space in this paper does not permit us to do

It is thought that the only possible way to publicly determine the value of Dr. Hobbs's discovery is to give away to all those who are interested in this matter a sample packet of this medicine and to have it done in such an open manner that none can question the honesty of the test. A large number of samples have been sent to the Sentinel office and will be handed out to all who apply, beginning Monday at 9 a. m. and continuing Tuesday until 5 p. m., Nov. 25 and 26.

There will also be given to each arfor a free sample a little book on Kidney Diseases, which sets out in a clear, plain manner just such information as you want

A TALK WITH NORDAU. He Is Opposed to Money Grubbing and All Forms of Hero Worship.

Max Nordau, the much-praised and muchblamed author of "The Lies of Civilization" and "Degeneration," quietly passes the even tenor of existence. For, however fiercely may wage the war of polemics, this truly learned man does not allow a singularly peaceful and domestic life to be intruded upon. My call upon him was in response to a personal invitation. For quite an hour we sat in the library chatting away on every conceivable subject-I ensconced in a deep leather armchair, he sitting at his writing table-the table upon whose broad back sheet after sheet of "Degeneration" was rapidly sketched and written. Dr. Max Nordau, whatever else he may

be, is neither quack, cheat nor fraud. Opat once being impressed with his candor and sincerity, accompanied by a courage which knows no fear, an unselfishness which knows no alloy. His learning and erudition are tremendous. He is saturated with Latin; he reads it, writes it, speaks it, and, I verily believe, thinks in it. He is a Duns Scotus, or an Alexander Hales, or an Alberius Mangus in plain clothes, in discourse and in disposition, while as a book-worm and a writer he is suggestive of a Jerome, an Austin of Hippo or a Thomas of Aquin. The activities of life have their solatium in the tranquil poring over of the pages of church writers, primitive and nediaeval. Max Nordau loves the "De Civitate Del," knows by heart A'Kempis, while the pages of the Vulgata-especially the "Sermon on the Mount"—are, as Terentius has it, his templa serena. Despite all this, he is an "unbeliever," although, I take it, sing this term, Nordau means no more disclaiming membership with any redeas and magnificent conceptions of human nduct probably has very much more "re than he is aware of, and certainly as much as a large proportion of his ortho-

Two things there are abominable in the sight of our amiable philosopher-money scraping and hero worship. I happened to refer to the evil of bartering intelligence for mere money, when he quickly swung round in his chair, seized last month's Century Magazine, and rapidly turning the pages, said: "You are right. My own view entirely. Listen to what I wrote on this subject only the other day." Then slowly, deliberately and with telling em-phasis, he read the following passage: "I have by no means given up the expectation of reading one of these days that I have been confined for so and so many years in a lunatic asylum—nay, that I am, perhaps, at this very moment an inmate of such an institution. A credulous lady who was actually disturbed by the numeras hints of this kind wrote me a letter. which she anxiously begged me to inform her whether it was really true that there had been lunatics among my ancestors; and she expressed to me her sincere reand she expressed to me her sincere relief when I assured her that the only evidence of an abnormal mental condition which had ever been observed in the members of my family was a strange indifference to money. For several generations both my paternal and maternal ancestors have accordingly been poor. They did not understand how to make money. They did not concern themselves about it. They preferred to occupy themselves with abstruse scholarship. They were robbis, or officials of Jewish congregations. As their heir, I have had frequest occasion to reproach them with their lank of months.

PROF. H. H. ENGLEHARDT'S

Last Week In Indianapolis.

THE WORLD'S CHAMPION LIGHTNING ARTIST.

During his short stay with us over thousands of homes will be graced with beautiful oil paintings made by this wonderful artist. Only ONE week more, and after this time your chance is LOST to get FREE OF CHARGE a rich oil painting, for which the usual artist would ask fifty dollars or more, and the fact that he does make the painting in six minutes, which ordinary artists would take thirty days to do, makes Prof. Englehardt's paintings the more valuable. Thousands can make a painting in a month, and but one real artist in six minutes. The purchase of one pair of shoes of \$1.00 or more entitles you to an oil painting, charging only wholesale price for frames. DON'T FORGET, only six days longer.

as an alienist, I should hesitate, on ac count of this defect, to charge them with insanity." The delightful irony of all this will excuse the quotation Max Nordau is equally frank in express-ing his hatred of all forms of hero worship. He is well acquainted with our country, speaks and writes the language with fluency, precision and grace, and nothing pleases him more than a trip to England and a quiet stay in the country with a few English friends. Five years, however, have passed since his last visit; and now tempora mutantur. The author of "Degeneration" has become, noiens volens, a public character, and the thought is a night-mare. "Yes," he said to me, "I am going to take a little holiday next month in England; but it will be strictly private. Nothing on earth shall induce me to make a public spectacle of myself. I shall stay with some friends at Woking and Ashford, and pass a few days in London. I have not the slightest intention of coming out of my shell. You know how quie my life is. Here, in Paris, my social circle is confined to some half a dozen old friends. As for patients, these only know me in my professional capacity. Scarcely one of them is aware of the fact that Dr.

THE PICKANINNY PREACHER. The Negro Race Likely to Develop Remarkable Characters. New York Commercial Advertiser.

Nordau has written a book.

There is now in town another negro phenomenon. A ten-year-old girl, very black, but without the African cast of features, has stirred up large audiences in certain sections of the South by her "revival" ef-forts. She is said to be less emotional than the "boy" revivalists, who are usually about forty years old, and who are without a single idea. She is a child in all her tastes and pleasures except when she is in the pulpit. Here she is a serious speaker, using moderate and intelligent language and speaking close to a text. Her words seem to be clothed with the power to imress her hearers to such a degree that scores at each meeting express a desire to adopt a religious life—persons who have resisted the persuasions and menaces of preachers of education. Perhaps the lesson of her success is that the pulpit which strives for converts has not reached the simplicity and directness which is so constantly usual in the respect. stantly urged in the gospels. That a little colored girl should be able to appeal to the intelligence of men and women seems improbable, yet it is asserted that this child avoids all strong appeals to the emotions. That is, she does not become hyserical and lead her hearers into an emo egroes have been struck by the pe

Persons who have seen much of the ualities of an occasional negro. In Ne Orleans, some years ago, there was a ne-gro woman who was called "gifted in rayer." She was uneducated and in orinary conversation had all the character-stics and used the common language of her race. At the prayer meeting she was another person. Her prayer was like the reading of a poem. She had the most picturesque and beautiful images, such as only the poetic mind could fancy, and her phrases were consistent with the beauty of the thought.
